Week

Themes

My Preschool and Me

These weeks will introduce us to our new preschool routine. We will become familiar with the different parts of our day and learn our school's procedures and safety protocols. We will also talk about ourselves, our likes and dislikes, and our families and pets.

The World Around Me & Community Helpers

This week will teach us about our local heroes (community helpers). We will also spend time learning about the weather, which will continue throughout the year during circle time.

All God's Creatures

This week will be spent learning about different animals that exist in our world. We will explore different places where animals live, such as the rainforest, the jungle, and even the zoo.

Fall Fun

These weeks will teach us about all the wonderful parts of fall. Apples, farm life, leaf drawings, pumpkins and more will be explored. At the end of the month all classes will participate in our costume parade and pumpkin parties!

Thanksgiving & Cooking

These weeks will be spent learning about the meaning of Thanksgiving and all the traditions that families have for this holiday. We will explore everything from going to the grocery store to cooking some fall favorites.

Christmas

These 3 weeks will be spent learning about the true meaning of Christmas. We will talk about the giving nature of the holiday and explore the season using our 5 senses. We will finish with our annual Christmas program where the children will perform their favorite Christmas songs.

Winter

As we welcome our students back from the holiday break, we will learn about the magic of winter. These weeks will be spent learning about polar animals and every child's favorite, snow!

Transportation

The kids will have a great time playing with and learning about all the different forms of transportation. We will explore the fun world of planes, trains, and automobiles.

Outer Space

This week will be an out of this world experience. From learning about the planets to space exploration, the kids will be rocketed to infinity and beyond!

Our Health, Dental Care & Our Feelings

During this season of Valentine's, we will teach about taking care of our health and teeth. We will also explore our feelings and talk about the people we love.

Fitness, Movement & Sports

Get ready to move, play, and have fun! This week will be full of open-ended play, playing sports, and exploring how our bodies actually move and work.

Let's Read!

During these two weeks we will celebrate Read Across America day and Dr. Seuss' birthday by exploring some of our favorite authors and doing projects based on our favorite stories.

St. Patrick's Day

This week we will explore rainbows, shamrocks, the color green, and those mischievous little leprechauns!

Spring & Easter

These two weeks, we will learn all about the changes spring brings. We will talk about flowers, butterflies, and pond life. We will spend time learning about Jesus and Easter traditions. Each class will participate in an Easter egg hunt and a classroom Easter party.

Dinosaurs

It's time to have some prehistoric fun with dinosaurs. We will learn about the different types of dinosaurs and the story of these fascinating creatures.

Sea & Summer

This last month of preschool will be spent learning about the ocean, sea creatures, and outdoor fun, like camping. We will also celebrate our country and all types of heroes!
